Sarah Jeon

UXR Operations Lead at Autodesk

Driving Research Efficiency to Fuel Business Growth & Innovation

sarahhjeon@gmail.com | +1 (437) 566 - 8695 | https://sarahhjeon1004.github.io/portfolio/

EXPERIENCE

Autodesk | 2025 - Present

UX Research Operations Lead

- Scaled research operations across 10+ researchers and designers on the XD team — standardizing workflows, data pipelines, and tooling to reduce time-to-insight and enable consistent, high-quality research at scale.
- Led cross-functional collaboration with Product, Engineering, and Design to architect an AI/ML tooling strategy: defined server workflows, established API decomposition principles, and mapped mental models to improve tool adoption and team alignment.
- Built an AI-powered search prototype that unified fragmented repositories (Prism, Dovetail, analytics pipelines), cutting research discovery time and eliminating duplicate work across teams.
- Designed and launched a KPI framework and research impact scorecard for 50+ team members — delivering monthly strategic and weekly operational reporting that directly informed leadership decisions.
- Founded a Customer Council on AI/ML trust and adoption, embedding client perspectives into product and governance strategy and shaping responsible AI roadmap priorities.

Getty Images | 2022 - 2025

UX Research Operations Lead, UX Research

- Transformed research operations for a team of 8 UX researchers and 2 service designers — mapping the end-to-end research journey, eliminating bottlenecks, and establishing repeatable, scalable processes.
- Designed and led a 3-month AI diary study in partnership with NVIDIA, integrating concept testing, usability testing, and moderated interviews — findings drove a 30% increase in enterprise and end-user adoption of AI tools.
- Led the Getty Images navigation redesign initiative, improving on-brand SEO traffic by 10%, boosting Google rankings, and enhancing accessibility across diverse customer segments.

McGill University SED-RG | 2020 - 2022

Research Associate

- Partnered with the Japanese Consulate to design and execute a COVID-19 isolation study for Japanese families in Canada — leading recruitment survey design, participant scheduling, and localization of all study materials.
- Conducted quantitative analyses (t-tests, ANOVA, correlations) using SPSS, Rayyan, and Endnote to produce statistically grounded insights that shaped evidence-based recommendations for research teams.

EDUCATION

McGill University
Montreal, QC
Bachelor of Arts, Major in Psychology, Minor in Behavioral Science and Sociology

University Toronto - School of Continuing Studies
Toronto, ON
Introduction to UX Design

CERTIFICATES

Google UX Design & Analytics Certificate

IBM Enterprise Design Thinking Practitioner

SKILLS

Software
Figma / Cursor/ Google Analytics /Looker Explore / SPSS / EndNote / Notion / Confluence

Methods
User Interview / Card Sorting / Diary Studies /A/B Testing / Competitive Analysis / Meta-Analysis / Literature Review / Survey / Qualitative / Quantitative / Agile

UX Platform
UserTesting / User Interviews / Userlytics / Dovetail /Looker Explorer /Looker Dashboard / Alida / Alchemer/Qualtrics / Miro / Airtable
